Please briefly summarise the key reason(s) for your support / opposition

The Ancillary Document Self- Governance rules were introduced to allow changes to be made to IGT UNC ancillary documents. With the improved changes to the IGT UNC Governance arrangements, the ancillary rules are no longer required, as the Self Governance arrangements provide for a more robust change process to be followed.

Therefore we support the removal of the Ancillary Document Self-Governance rules.

Self-Governance Statement

Do you agree with the Modification Panel's determination that this should be a self-governance modification?

As this change impacts the governance of the modification rules, for completeness this change should go to the Authority for decision.

Please state any new or additional issues that you believe should be considered

Relevant Objectives

How would implementation of this modification impact the relevant objectives?

Objective f)

Having one change process for a modification removes any ambiguity around which, of two processes, a change to an Ancillary Document should follow. By removing potential for discussion amongst iGT UNC parties, around which is the appropriate process, the efficiency in the administration of the Code is improved.

Impacts and Costs

What development and ongoing costs would you face if this modification was implemented?

None identified

Implementation

What lead time would you wish to see prior to this modification being implemented, and why?

We could support immediate implementation.

Legal Text

Are you satisfied that the legal text will deliver the intent of the modification?

Yes

Further Comments

Is there anything further you wish to be taken into account?

No
