How this proposal will, if implemented, impact on greenhouse gas emissions?

None

Implementation issues including impact on your systems:

In order to meet the requirements of the EU directive, RWE npower will be required to make system changes.

However, the flexibility with which dates are changed in this proposal could force more processes to be actioned manually. This presents a significant risk to the overall switching timescales which could negatively impact the customer.

The details/timetables contained within the modification proposal do provide visibility of the process, but due to the issues mentioned above the we are unable to provide support to this mod.
