Do Not Support	<input type="checkbox"/>

Please briefly summarise the key reason(s) for your support / opposition

This Modification proposes as a practical and proportionate solution for dealing with vacant sites. We support it on the understanding that the Performance Assurance Board will monitor its usage to ensure it is used appropriately and not abused.

Authority Direction Statement

Do you agree with the Modification Panel's determination with respect to whether or not this should be an Authority Direction Modification?

We agree with the proposer that this modification should be subject to Authority decision

Please state any new or additional issues that you believe should be considered

None identified

Relevant Objectives

How would implementation of this modification impact the relevant objectives?

We agree that this proposal positively impacts Objective D by enabling Shippers to reduce (upstream) transportation costs where they do not reflect the actual usage.

We also accept the Workgroup view that should this proposal be implemented for UNC sites but not IGT UNC sites, there would be a negative impact to Objective F.

Impacts and Costs

What development and ongoing costs would you face if this modification was implemented?

None identified

Implementation

What lead time would you wish to see prior to this modification being implemented, and why?

Implementation of this modification is dependant on approval and implementation of UNC equivalent Modification 0819 & XRN5615. If both Mods are approved, we should attempt to align the implementation dates, as far as possible.

Legal Text

Are you satisfied that the legal text will deliver the intent of the modification?

We are satisfied that the proposed legal text delivers the requirements of the modification

Further Comments

Is there anything further you wish to be taken into account?

Responses should be submitted by email to IGTUNC@gemserv.com
