

Summary of IGT UNC Workgroup – 12th December 2024

Purpose:

This paper provides Panel members with a summary of IGT UNC Workgroup discussions each month. Please note that any Modification(s) subject to review at this Panel meeting are not reflected in this document due to them already being on the Panel agenda. For a full extract of the discussion please refer to the Draft minutes which will be available [here](#) on 19th December 2024.

IGT UNC Modifications:

[UNC 0843 - Establishing the Independent Shrinkage Charge and the Independent Shrinkage Expert](#)

The UNC0843 legal text developer has provided the latest version of the legal text for UNC Modification to the Code Administrator. The Code Administrator advised that it will begin work on the legal text for [IGT165 – Independent Shrinkage Expert and Independent Shrinkage Charge](#) based on this legal text with the aim of presenting it at the February 2025 Workgroup meeting. BUUK raised concerns about the Shrinkage Expert levying charges on IGTs at LDZ level, adding that this will reduce incentives to IGTs to reduce shrinkage within their Networks as the charges may be smeared across all IGTs operating within every LDZ. The Proposer and Chair encouraged IGTs to attend the UNC 0843 Workgroups on 18th December 2024 and 22nd January 2025 to further discuss the implications of the Modification. The Code Administrator noted some aspects that will need to be covered by IGT165, including the potential provision of IGT supply-point level data to the Shrinkage Expert for charging purposes.

Pre-Modification and Cross UNC Code Discussion:

[UNC 0854 - Revision of Virtual Last Resort User and Contingent Procurement of Supplier Demand Event Triggers:](#)

Xoserve asked for an update on the IGT UNC equivalent Modification to UNC0854. The Code Administrator confirmed that they had spoken to Michelle Brown (Energy Assets), who has agreed to sponsor this Modification. The Proposer and Code Administrator will work together on the Modification, with an aim to discuss it at the February 2025 Workgroup meeting, before the Modification is officially raised at the February 2025 Panel meeting.

[UNC 0884 - Extending the PC4 Read Submission Window:](#)

There was a discussion over whether UNC 0884 will have an impact on the IGT UNC and the current Must Read Submission Window for IGTs, which was specified at 25 days in [IGT159 – Amendments to the Must Read Process](#). A potential Modification to reverse the impact of UNC 0884 on the IGTs' Must Read Process was discussed. Xoserve and Lee Greenwood (Centrica) took an action to look into the current process and clarify any impacts of UNC 0884 on the IGT UNC and its parties.
